Charles Henry Stas Boyeldieu

Backend Developer · *Ruby on Rails*

France · fully remote ch.boyeldieu@gmail.com +33 6 59 87 44 51 github.com/charleshsb
linkedin.com/in/charleshenry-stasboyeldieu stasboyeldieu.com

> Backend developer and Ruby on Rails enthusiast with 6+ years of production experience (Rails, TypeScript/NestJS, PostgreSQL, event-driven services). Background in finance, with hands-on experience of billing and collections. Currently on the product catalog and checkout of a Rails e-commerce platform. I work directly with users to turn needs into software, and build with AI every day, around Claude. Based in France, looking for a fully remote role.

EXPERIENCE

Backend Developer · Cheerz

08/2025 – present

Rails platform behind the mobile app, the website and the back-office: product catalog, orders and payment funnel

- Own backend features across the product catalog, orders and payment funnel, from API contract to production: promotions and gift cards, multi-package orders and delivery tracking, Google Pay.
- Design versioned API contracts and data models used by the mobile and web apps, including marketing consent and GDPR compliance, with backfill scripts.
- Clean up dead code, optimize database schemas, and improve CI and deployment to staging environments.
- Build with AI every day (Claude) and contribute to the team's AI development harness: shared skills, rules and review workflows.

Backend Developer · Ilek

03/2023 – 07/2025

- Impact teams on billing, then collection: invoicing customers, then reducing and anticipating unpaid bills.
- Built a NestJS / TypeScript service in hexagonal architecture, following CQRS, with AMQP messaging.
- Shipped new features in the Rails codebase (PostgreSQL).

Fullstack Developer · InvestGlass

01/2022 – 03/2023

- Swiss CRM for financial institutions: Rails MVC application, PostgreSQL, background jobs with Resque, plain JavaScript with AJAX.
- Customer integration and relationship management.

Fullstack Developer · Next Décision

06/2020 – 01/2022

- Gathered user needs and built business applications with React and Node.js, on Docker; designed microservices architectures on Kubernetes.
- Set up TDD and CI/CD (Jest, GitHub Actions); wrote complex SQL stored procedures.
- Ran projects in sprints, tracked development time against actuals, delivered a WordPress showcase site and trained its owner.

Freelance Developer

12/2019 – 06/2020

- Showcase and e-commerce websites, web portfolios; teaching assistant at Le Wagon, Paris; built a geolocated platform for freelancers (chat and posts).

Earlier career in finance

2014 – 2019

- Financial controller at Smalto (analytic accounting, P&L, KPIs, change management) and settlement manager at BNP Paribas (order book and treasury, team of 6, worked in English).

SKILLS

core	Ruby on Rails, PostgreSQL, Sidekiq / Resque, TDD
architecture	hexagonal architecture, CQRS, event sourcing, event storming, AMQP, REST APIs
platform	Docker, Kubernetes, CI/CD, Git, GitHub, GitLab
languages	TypeScript, NestJS, React, HTML, CSS, JavaScript
AI	Claude every day; AI harness for development: skills, rules, spec and review loops

EDUCATION

Le Wagon, Paris · full-stack web bootcamp — 2019

INSEEC, Paris · master's in audit and cost control — 2014

Kaplan, New York · intensive English semester — 2013

LANGUAGES

French — native

English — fluent (C2)
